

SCHEDULE "A" to By-Law No.70-20

Municipality of Clanwilliam-Erickson

Special Service Plan No.70-20 For Curbside Waste Collection and Operation of the waste Disposal Grounds

Pursuant to Subsection 314 of the Municipal Act

(A) Description of the Proposed Special Service

Council of the Municipality of Clanwilliam-Erickson is proposing to continue, as a special service, the weekly curbside collection of household waste from residences, trailer parks, commercial and institutional establishments within the urban centre of the municipality. In an attempt to reduce the amount of garbage entering the landfill which consequently increase costs, a bag limitation is being imposed. Two (2) bags are allowed to be placed curbside for collection without a collection sticker. Any additional bag(s) in excess of the two (2) free bags will require a collection sticker be adhered to the bag(s). Stickers can be purchased at the municipal office for \$2 per sticker. Each bag to be collected shall not exceed 25 pounds.

The two (2) bag limitation can be varied to include garbage bags that fit in one (1) waste container not larger than 120 liters, and the contents shall not weigh more than 50 pounds.

Council encourages residents to recycle and compost, both which effectively reduce landfill operating costs. The special service also includes 50% of the costs of operating the waste disposal grounds.

On the scheduled collection immediately following Christmas Day, the bag limit will be increased to 4 bags.

The collection service is for household waste and does not include any hazardous or chemical wastes, motor vehicle parts, used oil, animal carcasses or any other waste not normally associated with residences.

(B) Special Service Area to be Levied

The Special Service Area to be levied under this proposal will be residential property (including trailer parks) commercial and industrial establishments receiving the service within the urban centre and surrounding boundary of the urban centre including otherwise exempt property as outlined in Schedule "B". The Special Service Area excludes Railway Property (Class 52) and vacant lots.

(C) Estimated Cost of the Service

The cost of the service shall be the actual cost of curbside waste collection and 50% of the operating costs of the Waste Disposal Grounds. The 2021 estimated cost is based on the estimated costs incurred in 2020 for curbside collection, and 2020 budgeted net operating expenses of the waste disposal grounds. The estimated costs for the following years have been calculated based on a 3% increase per year.

2021	2022	2023	2024	2025
\$52,476.96	\$54,051.27	\$55,672.81	\$57,342.99	\$59,063.28

(D) Method and Rate of the Calculated Proposed Special Services Tax

The method of calculating the annual Special Service Tax will be based on a per parcel rate structure. The 2021 rates are based on number of pickups per week – residential receive one at a rate of \$200.19; commercial and institutional receive two at a rate of \$321.21.

	2021	2022	2023	2024	2025
Residential	\$200.19	\$206.20	\$212.38	\$218.75	\$225.32
Commercial/Institutional	\$317.30	\$326.82	\$336.62	\$346.72	\$357.12
